*What you are about to see has until
now been hidden from public view at
the cost of many lives of good men...*

They have an advanced transportation system joining the D.U.M.B.s that is able to reach speeds in excess of Mach 1.

They have been stocking these bases with massive amounts of food a a n

And have even developed the means to grow crops underground. Here they're growing rice.

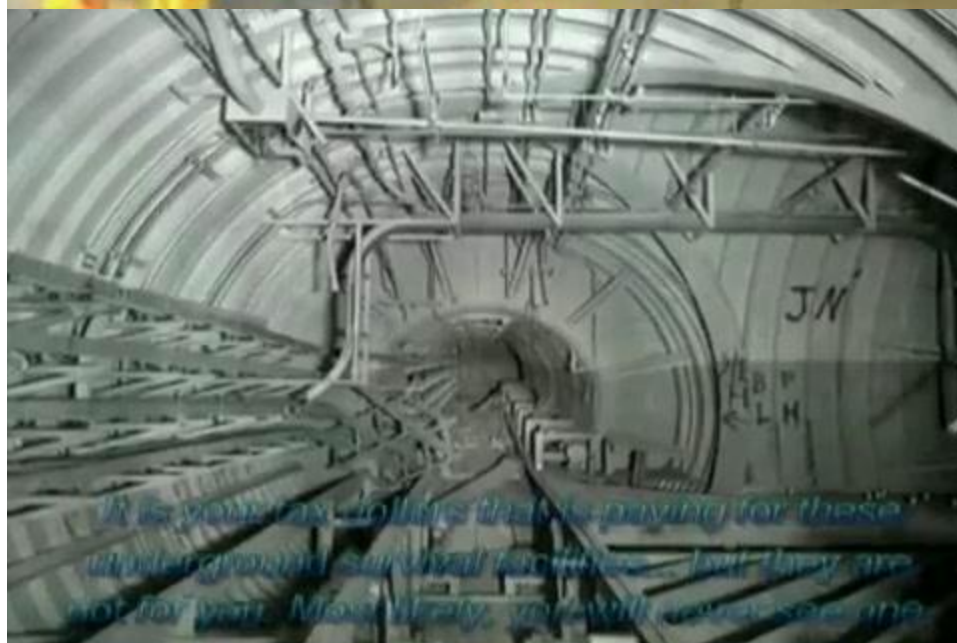

It is your tax dollars that is paying for these underground survival facilities... but they are not for you. Most likely, you will

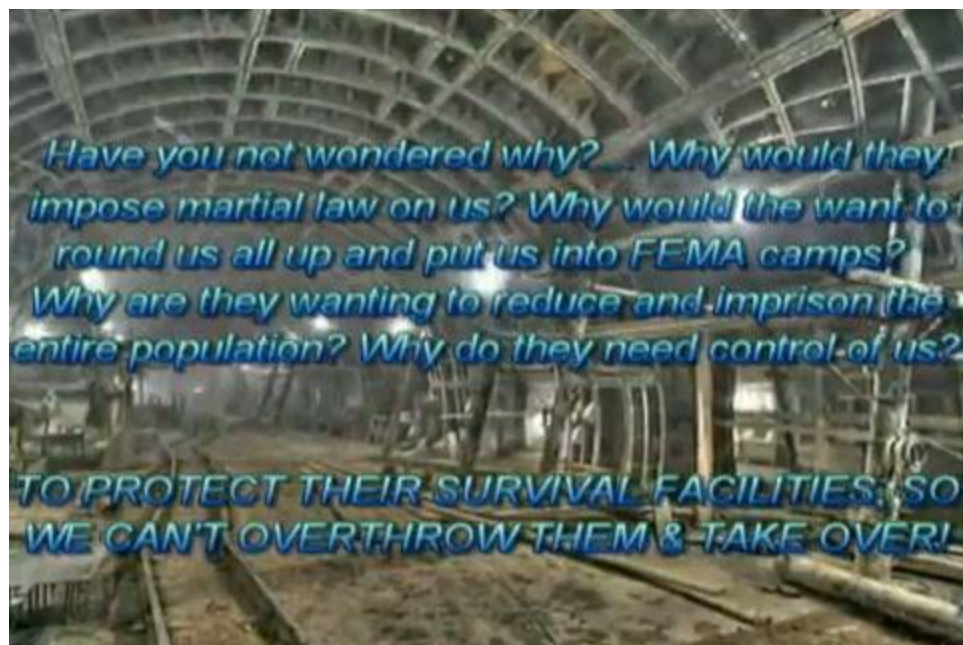

It is your tax dollars that is paying for these underground survival facilities... but they are not for you. Most likely, you will never see one

No, these facilities are only for the 'elite' and our government, maybe a few 'chosen ones' as well. They have built FEMA camps for us!

The pictures contained in this video are a collection from a collaborated group of anonymous hackers and personal researchers, I therefore cannot confirm the legitimacy of ALL of the pictures within... however, MANY of the pictures are legitimate photo's of actual D.U.M.B's and the diggers used to make them. The objective of this video is to bring this subject into the open and to show that the technology exists as do the facilities... and we're the ones paying for it!

IMPORTANT ! PLEASE READ !

In order to protect these facilities from a civilian takeover the government and military have been going to extreme lengths to arm not only themselves but also the MANY foreign troops they have already stationed here. This is to combat US !!! They are expecting us to rebel, an engineered civil war, and they have been very busy preparing for it!

Guess where your confiscated/turned in weapons really go...

from January 1 to December 31, 2006, the following Quartermaster items were delivered and accepted.

Anti-Riot Shield 618,000

Anti-Riot Helmet 760,500

Hand and Body Protector 440,000

Truncheon 181,500

- They may have us out gunned, but we have them out numbered and as they drop, these weapons will fall into the hands of 'we the people' and we will use their own weapons to ultimately defeat them. Many civilians will perish in the beginning, this is unavoidable... but that's the imminent price we will have to pay in order to prevail. I would rather die on my feet than live on my knees.

Vents to an Underground Base

Strange vents in the middle of desert to what could be an underground base. Found this near Dugway in Utah. It was near an abandoned cement plant north of Dugway, west of Great Salt Lake. Just a few miles off of the highway in the desert. there is no water north of Dugway (the great salt lake was 40 miles from this location) this was located smack dab in the middle of the desert. East of Wendover, I believe Google earth has the cement plant marked. I've seen things just like that up in the Uintas of Utah there just vents for water.

Where did I claim that those vents are a secret base? So ventilation vents and air conditioning units exchanging air with SOMETHING underground means that the topside housing units are the base itself? Also do some real research on what I captured on video before commenting as this IS the real deal. Climb the fence and see how long it takes for you to get arrested. if it's immediately then its high up shit, if you don't it's probably for a mine or nuclear waste dump. Oh yea.. that's definitely a secret underground base, no doubt about it. Mustn't have been too 'secret'. You're still alive. Intake vents for circulation...

Dugway the new area 51 they say. People called Dugway area 52 because they say that it's the new area 51.

This is very real. Google "Phil Schneider" and "deep underground military bases DUMB". According to internet reports, the Aliens are abducting humans, kidnapping them, then using them for experimentation, mainly under Dulce, New Mexico, under this mountain, and the black ops (secret operations government) gets advanced Alien technology in exchange for the humans. A lot of abductees have reported going into a mountain, then down into an elevator, and seeing aliens and humans.

They have vents like this in Phoenix off of Cave Creek road and the entrances are surrounded by Huge Boulders that have been strategically placed to not allow motor vehicles entrance At night if you go up there and listen you can hear forklifts and lots of activity coming from inside the mountain It looks very similar to this except there is no above ground doors. I'm not a freak and have taken some of my best friends there and turned them into believers! Don't knock this guy...
